

# WHAT SETS US APART?

At Optimotion Orthopaedics, Whether surgical or non-surgical, our practice strives to give each patient the best possible experience in joint care. We are pioneers in using minimally invasive surgical techniques, such as the lateral approach total knee replacement and the anterior approach total hip replacement. Alongside these techniques, we are now proud to offer the Optimotion Implants LLC total knee system to our patients. The Optimotion Implants system was co-designed by founder Steve Nguyen MD to enhance the benefits of the minimally invasive lateral approach, as well as increasing stability and longevity for the more active, younger patient.

## TAKE CONTROL OF YOUR KNEE & HIP PAIN

- Arthritis of the Knee & Hip
- Non-Surgical & Surgical Joint Pain Treatment Options
- New Technologies in Knee & Hip Replacement
